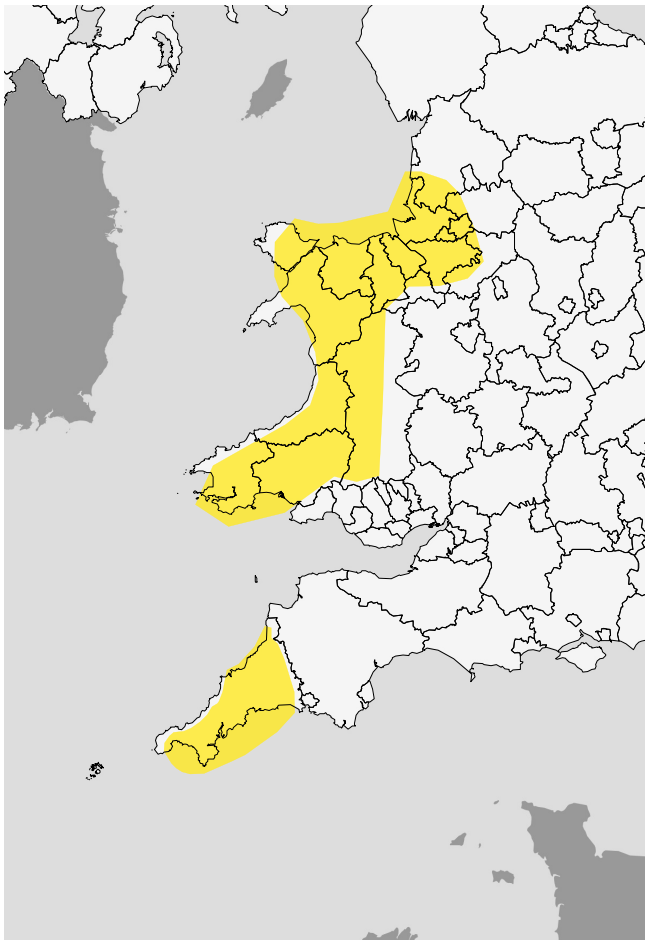
Yellow warning
Snow & Ice

Between
00:15 Thu 9 Jan 2025 and
11:00 Thu 9 Jan 2025



Snow and icy patches leading to some travel disruption.

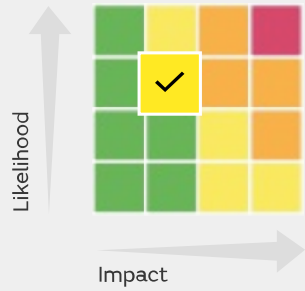
What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Showers, mostly of rain and sleet at low levels and near coasts, but of snow inland and over higher ground, are expected to affect the area later Wednesday night and on Thursday morning. Additionally roads are wet and cold across Cornwall following earlier rain and snow. With many surfaces falling below freezing, this will lead to some icy stretches on untreated surfaces, while a few cm of fresh snow could affect some areas, mainly places above about 100 metres.

What should I do?



Medium likelihood of low impacts

Issued at 10:28 Wed 8 Jan, 2025 Updated at 20:16 Wed 8 Jan, 2025

Yellow warning
Snow & Ice

Between
00:15 Thu 9 Jan 2025 and
11:00 Thu 9 Jan 2025

Further Details (continued)

Snowy, wintry weather can cause delays and make driving conditions dangerous. Keep yourself and others safe by planning your route, giving yourself extra time for your journey. Check for road closures or delays to public transport and amend plans if necessary.

If driving, make sure you have some essentials in your car in the event of any delays (e.g., warm clothing, food, water, a blanket, a torch, ice scraper/de-icer, a warning triangle, high visibility vest and an in-car phone charger).

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

Start time brought forward to cater for ice forming earlier across parts of Cornwall, following rain and snow on Wednesday afternoon and evening.
